SECTION 7: Handling and Storage

7.1. Precautions for safe handling

Advice on safe handling

Do not eat, drink or smoke at the work place. Product as supplied: avoid contact with eyes. Avoid prolonged skin contact. Unlikely to represent a dust hazard under normal handling conditions. Dental resins are usually processed in conjunction with reactive monomers and this may require the use of a higher level of PPE than necessary for the polymer itself. Please also see the advice in Sections 8 and 11.

7.2. Conditions for safe storage, including any incompatibilities

Storage:

Requirements for storage rooms and vessels

Acrylic polymers are supplied in either bags or bulk containers. Keep containers in a clean, cool and dry area away from heat sources. Natural ventilation is adequate.

Storage temperature: Ambient

Incompatible materials: Polymer contains residual benzoyl peroxide. This may react with oxidising agents, reducing agents, acids, bases and amines leading to decomposition.

7.3. Specific end use(s)

Not intended for thermal processing.

SECTION 8: Exposure controls / personal protection

8.1. Control parameters

In each case, the currently valid national exposure limit values for Dibenzoyl Peroxide, Methyl Methacrylate and dust must be observed.

Substance	EC No.	LTEL mg/M ³ (8 h TWA)	Notes
Dibenzoyl Peroxide	202-327-6	5	WEL
Methyl Methacrylate	201-297-1	208	WEL
Dust (inhalable dust)		10	WEL
Dust (respirable dust)		4	WEL

8.2. Exposure controls

Appropriate engineering controls

Do not eat, drink or smoke at the work place. Provide adequate ventilation, including appropriate local extraction, to ensure that the occupational exposure limits is not exceeded. Consideration should be given to the work procedures involved and the potential extent of exposure as the may determine whether a higher level of protection is required.

The following information is given as general guidance.

Individual protection measures, such as personal protective equipment (PPE)

Respiratory protection

A suitable dust mask or dust respirator with filter type P3 or FFP3 (EN 143 or EN149) may be appropriate. In the unlikely event of formation of particularly high levels of dust a self-contained breathing apparatus may be appropriate.

Skin protection

Wear suitable gloves. Butyl and nitrile rubber gloves are suitable. Later surgical gloves offer little protection.

Eye/face protection

Wear eye/face protection.

Safety spectacles / goggles / full face shield.
